INF2064: Web programming

Department	Computer Science
Program	Fondamental
Year of Study	2025 – 2026
Semester	04
Course Delivery	On-Site (Face-to-Face)
Course Code	INF222
Course Title	Web programming
Course Credit	60H
Instructor	Dr MESSI NGUELE Thomas
Office	218 (Computer Sciences Departement)
Email	thomas.messi@facsciences-uy1.cm
Mobile	(00237) 673 163 762

Course Description

This course introduces the basic languages that help to realize web applications.

Objectives

At the end of this course, students should :

- master the basic language used in web applications,
- be able to develop web applications from scratch,
- be able to develop web applications with existing frameworks,
- be able to develop web applications with existing CMS

Prerequisites

Students should have follow and master one course dedicated to a classical programming languages such as C, C++, Java, Python, etc.

Expected Competencies

- Develop web application from scratch.
- Develop web application by using existing framework or CMS.

Credit Hours

60H

Profile

Second year student of bachelor degree of computer sciences.

Course Content & Weekly Plan

Lectures	Lecture Topics	Observation
Lecture 1.	Chapter 1 : Introduction - Generalities on internet - Web applications architecture - Three-tier model	
Lecture 2.	Chapter 2 : Client-side technologies - HTML - CSS - Javascript - Ajax	
Lecture 3.	Chapter 3 : Server-side technologies - PHP (or JAVA and PYTHON) - MYSQL - Hosting Websites	
Continous Assessment		
Lecture 4.	Chapter 4 : Web development frameworks - Symfony (php) - Zend Framework (php) - Django (Python)	
Lecture 5.	Chapter 5 : CMS - Drupal - Joomla - Wordpress	
Lecture 6.	Chapter 6 : Introduction to web mobile applications - Generalities - Examples	
Exam session (ES)		

Assessment	Grading
1. Continuous Assessment	(20%)
- 4 minor Continuous Assessment	10%
- 1 main Continuous Assessment	10%
2. Practical Exam	(30%)
- 3 minor practical exams	15%
- 1 main practical exam	15%
3. Semester Final Exam	(50%)
